

A JOURNEY FOR BETTER

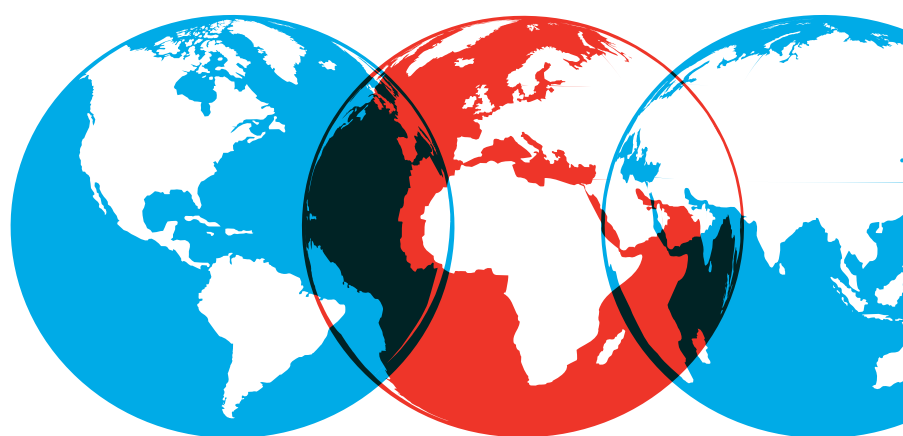

GLOBAL HEALTH

Continuing Lilly's commitment to global health since 1876

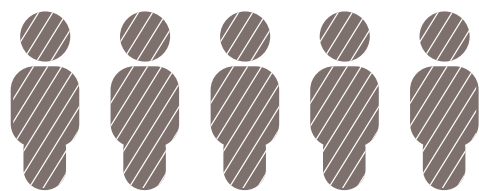

Lilly 30x30

For 140 years, Lilly has played an important role in improving health for people around the world. But for all of our progress – as a company and a society – we know that far too many are left behind.

We're taking the next step on our journey by announcing Lilly 30x30. **It's a new goal to help 30 million people in need by 2030.**

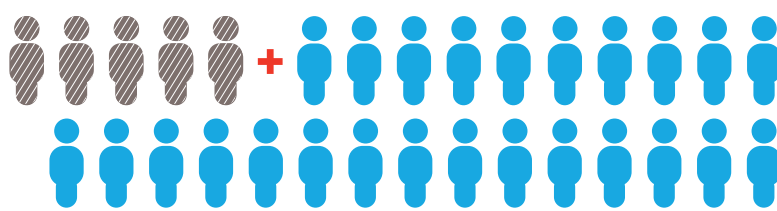

2015

Outside of our traditional business, we reached **5 million people** in resource-limited settings in 2015.

2030

We'll continue to expand our efforts so that by 2030 we'll reach **30 million people** in need each year.

Our Next Step Toward Reaching 30 Million People

Lilly Global Health Partnership

One of the cornerstones of our 30x30 goal is the Lilly Global Health Partnership, which builds on our decades of experience of improving health for people who lack access to quality care. Past collaborations have focused on tuberculosis and diabetes.

Now we're adding cancer-related work and expanding to more countries through a **new five-year, \$90-million commitment.**
